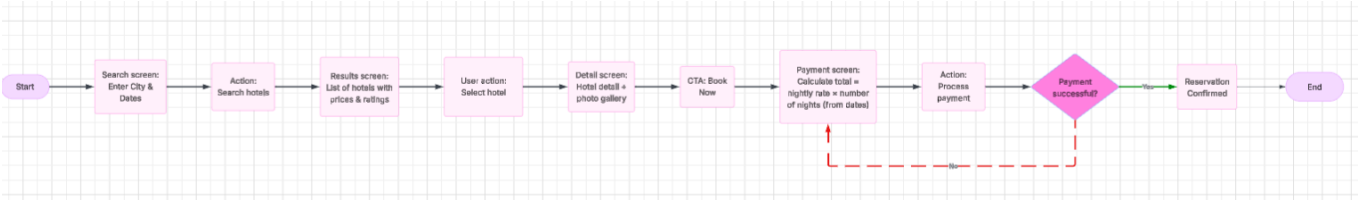
EXPERIMENT 6

ROLL NO: 240701161 NAME: HANISHKHA N

Simulate the life cycle stages for UI Design using the RAD model and develop a small interactive interface Axure.RP, Openproj

RAD MODEL Work Flow Diagram:



PROCEDURE:

Phase 1: Requirements Planning

- **Identify Key Features:**
  - **Search Interface:** Inputs for Destination, Check-in/Check-out dates, and Guest count.
  - **Results Dashboard:** List of available hotels (e.g., Ocean View Resort, Grand Plaza Hotel) with nightly rates and star ratings.
  - **Available Hotel Details:** Comprehensive hotel overview, interactive photo gallery, and an amenities list.
  - **Checkout & Payment:** Form for payment details and an automated order summary.
  - **Confirmation:** A success screen providing a booking reference and receipt view.
- **Requirements Document:** Documented user flow (using diagram mentioned above) from initial search to final reservation confirmation.

Phase 2: User Design

- **Axure RP Setup:** Launched Axure RP and created a new project titled "UID Experiment 6".
- **Create Wireframes:**
  - **Layout:** Developed a mobile-responsive interface utilizing the Axure widget library.
  - **Visual Elements:** Integrated high-quality imagery for the "Home Stay" and "Ocean View Resort" pages to enhance visual fidelity.

- **Add Annotations:** Used labels and text components to define the purpose of search fields and "Book Now" buttons.

Phase 3: Construction

- Develop Interactive Prototypes:
- Test and Iterate

Phase 4: Cutover

- **Finalize and Export:** Finalized all interactions and transition styles
- **Deployment:** Shared the functional prototype via **Axure Cloud** for review.
